Printable Ring Sizer

Print at 100% / "Actual size" (do not choose "Fit to page"). Then check the scale below before you measure.
Method 1: place a ring that fits you on the circles. The right size is the circle that matches the INSIDE edge of the ring.

SCALE CHECK: this line must measure exactly 50 mm (about 1 15/16 in) with a ruler.
You can also lay a credit card on the box at the bottom of page 2: it should match exactly (85.6 x 54 mm).

Between two sizes? Choose the larger one. For wide bands (6 mm or more) go up half a size.

Sizes are approximate. Need help? Message us on WhatsApp +92 311 2275086 or visit furqangems.com/ring-size-chart

Method 2: Ring Size Strip

1. Cut out the strip along the outer line, and cut the small slit at the start (marked X).
2. Wrap the strip around the base of your finger and pull the narrow end through the slit.
3. Pull until snug but not tight (it should still slide over your knuckle). Read the size at the slit.

Measure at the end of the day when your fingers are warm, and measure 2 or 3 times.

The number lined up with the slit is your US ring size. Short marks are half sizes.

Scale check: a standard credit card fits this box exactly.
If it does not, your printer scaled the page. Reprint at 100%.

US	Circumference	Diameter
3	44.2 mm	14.1 mm
4	46.8 mm	14.9 mm
5	49.3 mm	15.7 mm
6	51.9 mm	16.5 mm
7	54.4 mm	17.3 mm
8	57.0 mm	18.1 mm
9	59.5 mm	18.9 mm
10	62.1 mm	19.8 mm
11	64.6 mm	20.6 mm
12	67.2 mm	21.4 mm
13	69.7 mm	22.2 mm
